【摘要】

隨著數位圖書館的興起，醫學圖書館員擁有越來越多的機會為醫療專業人員提供醫療所需的資訊，為了善用這個機會，圖書館員尤其需要了解使用者的臨床工作內容與資訊行為。因此，本文以文獻分析法對於以下課題加以探討：醫療專業人員的資訊需求、資訊尋求與資訊資源、實證醫學觀念的影響、網際網路的影響與醫學圖書館的角色與任務。

With the development of digital libraries, medical librarians own more opportunities providing health-related information for health professionals than ever before. This article begins by reviewing studies of information needs of health professionals. Then the issues on health information seeking and information resource usage; the impact of evidence-based medicine; the impact of Internet; and the role of medical libraries are discussed.
